### SECTION 4: FIRST-AID MEASURES

#### 4.1 Description of first aid measures

**General notes:**

Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.  
Do not leave the victim unattended.

**Following inhalation:**

Move to fresh air. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

**Following skin contact:**

Immediate medical treatment is necessary as untreated wounds from corrosion of the skin heal slowly and with difficulty. If on skin, rinse well with water. If on clothes, remove clothes.

**Following eye contact:**

Small amounts splashed into eyes can cause irreversible tissue damage and blindness. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Continue rinsing eyes during transport to hospital.  
Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

**Following ingestion:**

Keep respiratory tract clear. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.

#### 4.2 Most important symptoms and effects, both acute and delayed

Harmful if swallowed, in contact with skin or if inhaled. Causes serious eye damage. Causes severe burns.

#### 4.3 Indication of any immediate medical attention and special treatment needed:

The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.

### SECTION 5: FIREFIGHTING MEASURES

#### 5.1 Extinguishing media

##### 5.1.1. Suitable extinguishing media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

##### 5.1.2. Unsuitable extinguishing media

High volume water jet

#### 5.2 Special hazards arising from the substance or mixture

**Special hazards during firefighting:**

Do not allow run-off from firefighting to enter drains or water courses.

**Hazardous combustion products:**

In case of fire the following hazardous decomposition products may be produced: carbon oxides, nitrogen oxides (NO<sub>x</sub>), sulphur oxides, hydrogen cyanide (hydrocyanic acid)

#### 5.3 Advice for firefighters

Special protective equipment for firefighters  
Wear self-contained breathing apparatus for firefighting if necessary.

**Further information:**

Collect contaminated fire extinguishing water separately. This must not be discharged into drains.  
Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.
